

# Pre-Application Site Visit Report

## Project 6470581, 6000 17TH AVE SW

---

**Assessment Completed:** 6/1/2015

**Project Description:** Replace deck accessory on duplex I17 per plan.

**Primary Applicant:** [Barbara Osinski](#)

This report lists a preliminary assessment of project requirements based on your pre-application site visit (PASV). The PASV is completed by site inspectors from the Department of Planning and Development (DPD).

### Next Steps

1. Review the requirements in this report and contact the staff members listed below with questions.
2. Schedule an appointment for permit application intake with DPD. **Please bring a copy of this report to your intake appointment.**

### Questions About This Report

If you have questions about the information in this report, contact:  
Roger E Moore, (206) 733-9039, [Roger.Moore@seattle.gov](mailto:Roger.Moore@seattle.gov)

### Other Resources

- General questions about the permit process: Contact the DPD Applicant Services Center (ASC) at 206-684-8850.
- User-friendly guides to city permitting processes: [DPD](#) and [SDOT](#).
- [Detailed zoning information](#).
- Visit our [permit type pages](#) for step-by-step instructions and forms for preparing your application and plans for review.

### Pre-Application Site Visit (PASV) Requirements

PASV report requirements may be subject to additions, changes, or modifications by the department. The purpose of the report is to alert the applicant that there may be unusual or complex site conditions that trigger requirements from the department regarding this project. **The applicant is responsible for providing all required documents at the intake appointment.** If you have questions about this report or the PASV process, please contact the DPD Site Development Team at (206) 684-8860.

**Note:** Any project application associated with the development site can utilize the results from this PASV if the application is accepted by DPD within 24 months of the above inspection date. After 24 months, the applicant must apply for another PASV. No extensions will be granted.

The site plan did not include the following existing or proposed elements:

Nothing noted on drawing submitted for Pre-Application Site Visit.

### ECA Mapping Unit and Type

This project site appears to include the following ECAs and/or buffers:

Steep slope  
Wetland

### Earth Disturbance

If temporary cuts greater than 1h:1v will be required in order to facilitate construction activity, please provide a geotechnical engineer's verification that soil conditions allow cuts to stand unsupported. Include detailed cross sections.

## **Existing ROW Conditions**

### **17TH AVE SW**

Street conditions:

Asphalt paving

Visible pavement width is: 24 LF

Curb conditions:

Curb adjacent to site

Concrete

Approximate curb height: 6 inches

A storm inlet is located <350 ft from the site and prior to crossing a public right of way. Inlet at south end of 17th Ave SW.

It appears that drainage from that discharge point will remain in the gutter line all the way to the nearest inlet structure, but this assessment is preliminary and it is the responsibility of the applicant to meet all relevant SW code requirements.

## **Potential Impacts to Seattle Parks Property**

No parks property in vicinity

## **Construction Stormwater Control**

All projects with earth disturbance, regardless of size, require temporary and permanent stormwater control in accordance with the Construction Stormwater Control (CSC) Technical Requirements Manual ([DR 16-2009, Volume 2](#)).

**Show the following on the [Construction Stormwater Control and Soil Amendment Standard Plan](#):**

Cover bare soil with compost blankets, straw, mulch, matting, or other approved equal to control construction stormwater runoff.

Cover stockpiles and bare slopes with compost blankets, tarps, matting or other approved equal to control construction stormwater runoff.

A First Ground Disturbance inspection is required before any ground disturbance related to this permit, including demolition, tree cutting, clearing, grubbing, and grading. After your permit is issued, schedule an inspection by calling (206) 684-8900 or [online](#) at <http://web1.seattle.gov/DPD/InspectionRequest/default.aspx>.

## **Inspectors Notes**

No additional Inspector notes.

## **Modifications to ECA Submittal Requirements**

- Modification to ECA Submittal Requirements: Proposed work is far and away from any Steep Slope. Per Jim Mattoon, ECA-Steep Slope submittal requirements are not required for this proposed work. Roger E Moore, (206) 733-9039, [Roger.Moore@seattle.gov](mailto:Roger.Moore@seattle.gov)
- ECA Exemption Note: Work appears very likely to be in a wetland buffer. Proposed deck likely would NOT qualify for an ECA exemption but redesigning to meet the allowance for a small project waiver may be a possibility. Seth Amrhein, (206) 386-1981, [Seth.Amrhein@seattle.gov](mailto:Seth.Amrhein@seattle.gov)

## **Standard Submittal Requirements for Projects in an ECA**

The site appears to have areas with wetland vegetation and/or seasonal or permanent saturation. The permit application should be routed to a DPD wetland specialist for further review.

Submit a Wetland Site Assessment Report prepared by a qualified wetlands professional that evaluates and identifies wetlands within 100 feet of the subject property line for development proposed within 100 feet of a wetland (see SMC [25.09.160](#)).

Prepare a wetland delineation report per [Director's Rule 19-2006, Requirements for Wetland Site Assessment Reports](#).
